PUSH PULL ROTATE® DOOR LOCKS *From Hampton Products International*

<p>What is PUSH PULL ROTATE?</p>	<p>Brink's Home Security PUSH PULL ROTATE door locks are the first knobs and levers that open three ways:</p> <ol style="list-style-type: none"> 1) Traditional way: Rotate the knob or lever with your hand 2) Easier way: Push on the knob or lever with your hip or elbow 3) Easier way: Pull on the knob or lever with your finger <p>No matter which way it's opened, the door latches, closes and locks exactly like a "traditional" lock does. It's a better way to open a door.</p>																				
<p>Why a PUSH PULL ROTATE door lock?</p>	<p>PUSH PULL ROTATE makes opening doors easier. The line is ideal for today's busy homeowners who seem to always have their hands full, whether carrying the baby, the laundry, the groceries, their briefcases, food for the barbecue, greasy rags for the garage, a tray of lemonade, tools for the garden ... there are hundreds of possible usage scenarios. Even if their hands aren't full, pushing or pulling on a knob is easier than grasping and turning a knob.</p>																				
<p>More than 100 Style and Finish Combinations</p>	<p>The line includes a full range of architectural styles and more than 100 combinations of entry, privacy and passage knobs, levers and handlesets. Exterior door locks also have matching deadbolts. Inactive knobs and levers are available to complete any project.</p> <p>Available finishes: Polished Brass, Tuscan Bronze, Satin Nickel</p> <p>The various PUSH PULL ROTATE styles are pictured here:</p> <table border="1" style="width: 100%; text-align: center;"> <tr> <td style="width: 25%;">Alwood</td> <td></td> <td style="width: 25%;">Barrett</td> <td></td> </tr> <tr> <td>Arnett</td> <td></td> <td>Lindingham</td> <td></td> </tr> <tr> <td>Glenshaw</td> <td></td> <td>Ganyon</td> <td></td> </tr> <tr> <td>Harper</td> <td></td> <td>Stafford</td> <td></td> </tr> <tr> <td></td> <td></td> <td>Webley</td> <td></td> </tr> </table>	Alwood		Barrett		Arnett		Lindingham		Glenshaw		Ganyon		Harper		Stafford				Webley
